## Statement :: .:

For the correction of possible misunderstandings on the part of employees, citizens and others interested, as to the position of the mine operators of the Tonopah and Juvide districts, whose properties are at present imperative the following is submitted -

There is and has been no intention to take advantage of the prevailing industrial conditions to our wages. The new scale of wages was made effective as an economic necessity and with the object of analyting the lower grade ores, of which very large tonnages are available in the mines and which could not be handled under previous high rost conditions, to be mined and treated. By the utilization of these low grade ores the profitable life of the mines and the consequent continued prosperity of the camp, will be greatly extended. Under present conditions it is particularly incumbent upon all, employees, employers and sitizens, alike to aid in tiding over the financial depression.

The new wage scale was determined upon as the highest that could be paid, with no thought of further reduction so long as general conditions allowed operations to be continued and with the specific object of keeping the Tompah wage scale, in the future in well as in the past, higher than the scales of other mining districts of the country,

The mines will be operated on the new wage scales as and when it is possible to operate. Because of the exodus of miners and other workers from the district it appears inperative to recruit labor from outside, but former employees who are willing to contentedly return to work will be wel-

Nothing can obstruct the continued operations of the mines and the prosperity of the community excepting preventive measures that may be taken by labor agitaines and others and it is carnestly hoped that such procentive meas-TONOPAH & DIVIDE MINE OPERATORS ASSOCIATIONS.
